Connecting Care • Creating Community

eForms Webinar: Sat Apr 17, 9 am - Noon

eForms were the #1 requested training topic identified by our subscribers.

This is a free webinar with 2 main segments.

9 am - 10 am: The Provincial eForms Solution repository for electronic forms is driven by the vision of “all healthcare forms, always up-to-date, all points of service, pre-populated where possible, and delivered electronically.” Integration with the OSCAR EMR is planned for later in 2021. This will allow real-time retrieval of up-to-date forms and electronic transmission of completed forms directly from your EMR, improve form availability and the end-to-end form workflow for both clinicians and form owners, provide instant on-demand updates to existing forms. It will help “axe the fax” in BC!

Presentation by Oliver Thompson and Rachel Barker, PHSA

10 am - Noon: All About eForms - eForm design, creation using the eForm generator, updating, importing, uploading, adding, organizing, signing, sharing, searching for, naming etiquette, and ordering eForms.

Led by: Dr. John Yap and Dr. John G.M. Robertson

RESERVE YOUR SPOT [here](#). Connection details will be emailed to you. You can participate in either segment or both, by joining at the appropriate time.

General Practice Services Committee

GPSC Billing Webinar, Part 1. Thurs, April 8 from 6–8 p.m. PST

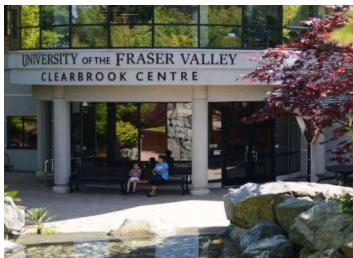

[Register](#)

- GPSC Preamble overview.
- CLFP Portal, Locum Portal and Long Term Care Portal (14070, 14071, 14072).
- Overview of responsibilities for most responsible provider as per GPSC Preamble.
- Locums.
- Communicating with patients (14076, 14078, 14023).
- Conferencing about patients (14077, 14018, 13005).
- Advice to another provider (13005, 14019, 14021, 14022).

GPSC Billing Webinar, Part 2. Thurs, April 29 from 6–8 p.m. PST.

[Register](#)

- Complex care (14033, 14075).
- Chronic disease management (14050, 14051, 14052, 14053)

MOA Training at U of the Fraser Valley

Medical Office Assistant Certificate

Start Date: September, for 4.5 months

Evenings: Tues & Thurs 6-9 pm online

Tuition: \$6,120 (prog. eligible for financial aid)

[Learn more here](#)

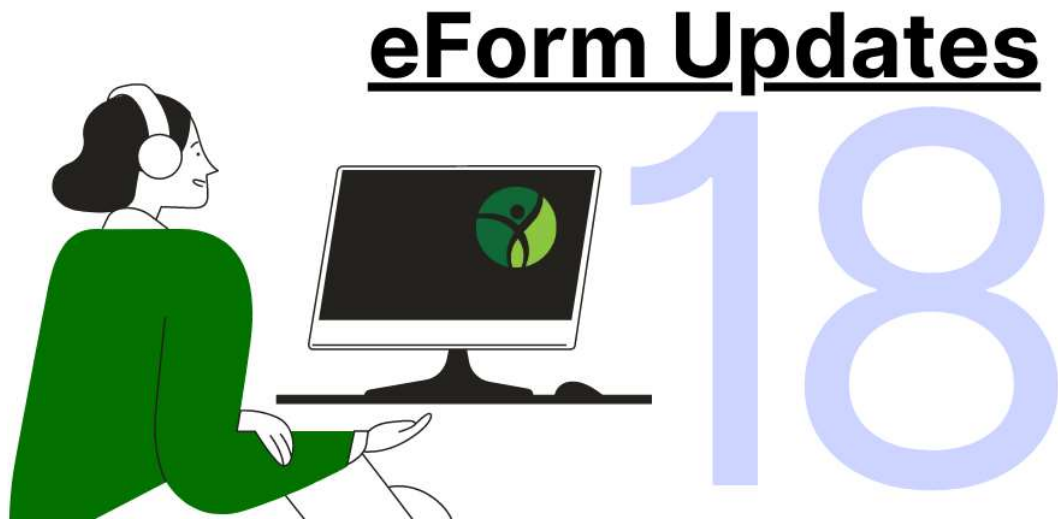

VIRTUAL CBT SKILLS GROUPS AVAILABLE NOW

The Cognitive Behavioural Therapy (CBT) Skills Group program is an MSP-funded, physician-led program for adult patients (17.5-75 years old) who want to learn practical tools to improve their mental health. It's a self-management course targeted at anxiety, depression and stress that integrates basic neuroscience concepts with introductory mindfulness and cognitive behavioural therapy teaching. It is delivered as an eight-week series of 90-minute group medical visits, with 15 patients per group. Patients learn practical tools to recognize, understand and manage patterns of feeling, thinking and behaving. They learn to be conscious of their choices as they respond to life stressors, and explore options for living a fuller, richer life, more aligned with what they value most.

Physicians across the province can now refer to the CBT Skills Group program directly and patients enrol and participate online, with little to no waitlist. Referral forms are now embedded in [OSCAR](#).

Click [here](#) for instructions to refer your patients.

eForms & Forms Updated in Feb and Mar 2021

You can search for eForms on the [OSCAR BC](#) website, [BC eForms Search](#) page by entering keywords in the Search box. If an eForm is on World OSCAR, it is findable in the OSCAR BC, BC eForms Search page.

Dr. John G.M. Robertson, OSCAR BC Director & OSCAR eForms

Librarian, has provided info regarding the eForm updates, except where noted.

1. Special Authority form & Diabetes form

The Special Authority forms have been updated once again. Specifically, between October and December of 2020 they updated the 3rd line diabetes medications. The new general Special Authority form (V29) and the new Diabetes form are posted [here](#) and [here](#).

2. Surgical Patient Optimization Collaborative (SPOC)

Posted [here](#) and [here](#)

"This form was generated in the course of the "Surgical Patient Optimization Collaborative" (SPOC) project currently being piloted in Campbell River with some DoBC / PSP support. It is expected that other health authorities will soon have their very own versions of SPOC forms. This is in the context of the current enthusiasm around perioperative medicine and "ERAS" principles. The idea is that FPs will work with their patients to address a series of specific concerns brought up by the surgeons/anaesthetists to "optimize" them in the weeks and months while they are wait-listed for surgery. Concerns such as glycemic control, obesity, OSA, substance use or smoking etc. FPs then are required to report back to the preoperative team in a specific format, hence this "SPOC" eForm.

- Pre-Op Prehab Planning Action Tool PDF is also included.
- Drs Yap and Klein have been diligently using various javascripts and CSS to make this form more user friendly."

3. Fraser Health Non-Resident Waiver

Posted [here](#) and [here](#)

Waiver for Governing Law for Non-Residents of Canada receiving Laboratory Services in Fraser Health

4. Royal Columbia Hospital Cytogenetics Cancer Studies Requisition

Posted [here](#) and [here](#)

"Created at the request of Cheam Family Practice. For Blood and Bone Marrow Cytogenetics Cancer Studies."

5. Updated STOP BANG eForm

Posted [here](#) and [here](#)

Gunther Klein and John Yap have updated the STOP BANG eForm. The 2019 version has been removed from both sites.

6. RBTs for COVID Vaccine Booking for BC

Posted [here](#) and [here](#)

For a reminder on how to get them into your server, you can have a look at the OSCAR BC Youtube Channel's Introduction to Report By Templates video [here](#). "Tracy Monk has asked that I post these report by templates created by Paras Mehta (thanks Paras!). There are 2:

The first has 8 options - 1) Pts not seen (49-79yo, no appt since March 15, 2020) 2) Pts 90 and older 3) Pts 85-89 4) Pts 80-84 5) Chronic disease patients 6) Cancer patients 7) Immunocompromised 8) Mental Health and Substance Use. The second allows you to choose: 1) the provider 2) ICD 9 codes 3) age greater than 4) age less than and 5) not seen since - date."

7. SOPLR for Maternity Care services requisitions

Posted [here](#) and [here](#)

"I have been asked to add some choices to the side menu of the Standard Outpatient Lab Requisition for Maternity. No major changes, Version 10 now has 2 additional options in the menu for first trimester tests - 1 adds Ferritin and Urine Dip, the other adds Fe, U Dip, and Parvovirus." This form has been made with some bells and whistles. Please beta test and give feedback."

8. Canadian Blood Services Requisition (BC and YT)

Posted [here](#) and [here](#)

This form has been made with some bells and whistles. Please beta test and give feedback.

9. Neurology Outpatient Referral Form for JPOCSC June 2020

Has been moved from the Beta testing side to the permanent side [here](#). The 2015 version has been deleted.

10. Neurodiagnostic Requisition ARHCC 2019

Has been moved from the Beta testing side to the permanent side [here](#). The 2017 version has been removed.

11. CBT Skills Group Program Provincial Referral Form (2021)

Posted [here](#) and [here](#)

This form was developed by Open OSP at the request of the CBT Skills Groups Society of Victoria, and modified by John Robertson.

12. BCCA VGH Flow Cytology Requisition 2018

Posted [here](#) and [here](#)

Created at the request of the Cheam Medical Centre (Cheam Family Practice). Requisition for Flow Cytology for BCCA and VGH (joint request form).

13. Recurrent Pregnancy Loss Referral form for BC Women's Hospital

Posted [here](#) and [here](#), in place of the 2019 version

"Dr. John Yap has updated this form with links to other parts of the chart and a tickler function to check on the progress of the referral. I have done some re-formatting and I removed some code that might cause an error if certain measurements have not been added to an individual server."

14. Cancer Genetics and Genomic Laboratory Myeloid Tumor Testing March 2020

Posted [here](#) and [here](#)

"This eForm is clearly only going to be used by a select few. However, others may be interested in some of the code. I have created a function called changeAndCheck. This "toggles" the "required" attribute of a text field that follows an X box (when the Xbox is checked or unchecked) and reports on the validity of the text field (is the required field filled?). It requires that the diad be named after the fashion "AnXbox" and "AnXbox_Text" to work (as with all javascript it is case sensitive). It is designed to be used multiple times in an eForm to simplify and decrease coding. If you have Xbox fields that require more information if they are checked (requires interpreter - language; Specimen type Other - specify) this coding would make sure that the fields get filled. There is also an "onbeforeprint" validity check for the entire form. This doesn't actually prevent you from printing the form, but when you go to print it, pop-ups will occur and fields will be highlighted in red. You can then cancel the printing and go back and fill out the fields (or I suppose you could print it anyways). You can not submit a form if the required fields are not filled. If you really don't want to fill them, put a space in them."

15. Cancer Genetics and Genomic Laboratory Lymphoid Testing March 2020

Posted [here](#) and [here](#)

Another requisition created to go with the bone marrow requisition - likely limited appeal.

16. Fraser Health Bone Marrow Requisition 2020

Posted [here](#) and [here](#)

This form connects to the 2 previous forms. Created for Cheam Medical. And it has "Circle Xboxes"

17. FH Insulin Sliding Scale 2016

Posted [here](#) and [here](#)

"This form was requested by colleagues. Fair warning - the pdf file has a 2016 date on it, but the image has a 2009 date on it. I can not promise that this is up to date, but I do not have any other images."

18. Fraser Health Phlebotomy orders

Posted [here](#) and [here](#)

"Not to be confused with the Outpatient orders from 2015 that include phlebotomy. These orders are from 2017. Created at the request of Cheam Medical. This form has a new version of the signature script that Dr. Yap has been working on (will let him detail it). It also uses various forms of the required attribute and the reportValidity() function to highlight when inputs are required."

Order eForms

OSCAR BC would be pleased to create an eForm for you. Quotes are typically provided within one week. Please visit our website and [fill out the request the form](#).
